

Social Science
Half-Yearly Mock Test - 4.
Class IX.

38/80

Section A: Write the Correct Answer (20 Marks).

- ans 1. Economics. ✓ 1/1
- ans 2. Rule by the people ✓ 1/1
- ans 3. We, the people of India. ✓ 1/1
- ans 4. Temperature. ✗ Wrong answer. Correct: latitude (distance from the equator). 0/1
- ans 5. Most important ✗ Wrong answer. Correct: lowest 0/1
- ans 6. Nile. ✗ Wrong answer. Correct: Indus 0/1
- ans 7. Tigris and Euphrates. ✓ 1/1
- ans 8. tectonic plates. ✓ 1/1
- ans 9. Basalt ✓ 1/1
- ans 10. on the earth humans are live. ✗ Incomplete. Correct: Earth supports diverse life and varied features. 0/1
- ans 11. Choice ✗ 0/1
Wrong answer. Correct: Economics
- ans 12. Universal Adult Franchise means that every adult citizen has the right to vote in elections without any discrimination. ✓ 1/1
- ans 13. Nitrogen. ✓ 1/1

✓ ans 14. The atmospheric condition of a particular place at the same time and change day-to-day is called weather. **1/1**

✗ ans 15. Hindafghan Civilization. **0/1** Wrong answer. Correct: Mohenjo-daro

✓ ans 16. True **1/1**

✗ ans 17. Egyptian Civilisation → Sumerians **0/1** Wrong answer. Correct: Egyptian (Nile Valley) Civilisation.

ans 18. When we want two things at the same time but resources are limited so, we need to put the choice between them. So, the value of given up object is called an opportunity cost. ✓ **1/1**

ans 19. Judiciary ✗ **0/1** Wrong answer. Correct: Legislature (Parliament)

ans 20. Deltas ✓ **1/1**

Section B: Very Short Answer Questions (12 marks).

ans 21. Social science is the academic study of human society, relationships, behavior, and how people interact within communities and institutions. ✓ **1.5/2**

ans 22. Two features of democracy are:

✓ ★ Free and Fair Elections: Citizens choose their leaders through regular and open voting processes. Parties currently in power have a fair chance of losing the election.

Q21: Methodology and purpose of Social Science not mentioned.

★ Rule of Law: Law is supreme, and every person - including government officials - is equal before the law. No individual is above legal accountability. **2/2**
Good.

ans 23

Weather

Climate

★ Weather is the day-to-day state of the atmosphere at a specific place & time.

★ It is change day-to-day.

★ The average weather conditions of a place over a longer period of time refer to the climate of the place.

★ It is stay for a longer period of time. Maybe it change after one or two years.

2/2

ans 24 Two features of ^{the} Harappan cities are:-

★ Great Bath was found there. ✓

1/2

Second feature missing - only one feature given.

ans 25 Scarcity means is the basic economic problem of having limited resources to satisfy unlimited human wants. ✓

Example:- when we go at a shop for buying t-shirt but every t-shirt price is ₹ 500 at fixed rate. So, our budget is only of ₹ 500 and we want two t-shirts, so that means we have scarcity of money in that situation.

Example explanation is muddled; link to scarcity unclear.

1.5/2

ans 26 1. Fold Mountains ✓

2. Volcanic Mountains. ✓

2/2

SECTION C: Short Answer Questions (18 Marks).

ans 27 IMPORTANCE OF STUDYING SOCIAL SCIENCE:-

Studying of Social Science is important because from we know about our earth - how it is made up, from which elements it is made and how different processes take place in atmosphere just like why rain occurs or how, how landforms are formed, etc. It also tell us about history that how people from that generation to come in this generation, how they evolved, how they learn so many things and how different kings ruled in India and why, etc. It tell about economics and political science also that how government make laws or formed, how market worked, how people start their business, how why we make choices or why scarcity occurs, what is resources, etc.

No critical thinking, empathy or personal relevance explained.

1.5/3

ans 29. STRUCTURE OF THE ATMOSPHERE :-

Earth's atmosphere is a layered structure. It consists different layers. These layers are:

1. Troposphere :- It is the most important layer of the atmosphere, which extends up to 12 km. In this layer, temperature decreases with increasing altitude. The air we breathe, also consist there. In this layer, mainly all weather phenomena takes place such as rainfall, fog, hail, etc. The transition zone lies between it and the second layer is called tropopause.
2. Stratosphere :- It is the second layer lie in the atmosphere, which extends up to 50 km. This layer consists of one of the most important ozone gas which formed a layer in this, who protect us from harmful ultra-violet radiations came from the sun. This is ideal for aeroplanes because in this layer clouds are not present and don't any weather phenomena occurs so, there is no chances of accidents.
3. Mesosphere :- It is the third layer of the atmosphere, which extends upto

80 km. ~~when we~~ In this layer temperature decreases with increasing altitude. Most meteorites entering from space burn up in this layer.

4. Thermosphere:- It is the fourth layer of the atmosphere, which extends up to 80 km to 700 km. This layer ~~consist~~ consist gas molecules which absorb the X-rays and short-wave ultraviolet radiation of the sun. It helps with radio transmission by reflecting radio waves transmitted from the earth back towards it. Ionosphere is also a part of the thermosphere. Auroras lights in northern and southern also occurs in this layer.

The uppermost layer of the atmosphere is known
5. Exosphere:- It is the last layer of the atmosphere, which as the exosphere, characterised by very thin air. Light gases like helium and hydrogen float into space from this layer due to weak gravity.

3/3

Ans 30 FACTORS AFFECTING CLIMATE :-

1. Temperature ✓
2. Humidity ✓
3. Precipitation ✓
4. Atmospheric Pressure ✓
5. Wind

0.5/3

Only weather elements listed; no factors of climate explained.

SECTION D: Long Answer Questions (20 Marks).

Ans 34 Economic Problems

1. What to Produce?

✓ Major economic ~~for~~ problem is 'what to Produce'. ~~means~~ Government are in doubt what they produce more if they produce higher demanded product then other products ~~the~~ production ~~are~~ of

Basic ^{fall on} other products are ~~de~~ less in market and their demand will ^{also} fall. If they want to produce both things at same time so, it is impossible because resources are limited. So, they need to take decision and produce both things equally from which they earn profit or ~~lose~~ people's basic ~~needs~~ also fulfill. And they need to also label on balance higher demanded products from which they earn profit from people.

Q37: Part (iii) on qualities of free and fair elections not answered.

2. How to Produce?

Now, second major problem is how to produce because resources are ~~are~~ limited and human wants are unlimited. So, they need to balance production between human demands. Human demands are differ by time-to-time some people wants ~~one~~ one thing and others want other things so, government are in problem how they produce both things at same time. If they produce basic wants more as compare to higher demanded wants so, they don't earn profit from this.

3. For whom to Produce?

Now, third major problem is that for whom to produce. After solving both ~~the~~ two problems, they are think for whom they produce because if they produce for rich people's so, poor people take action for them but rich people's give them more money as compare to poor people's but ~~democracy~~ is for equality for all people's, poor people's all have right to ~~buy~~ buy products, so, government fixes affordable prices of all object from which both are able to buy it. **3.5/5**

'How to Produce' lacks production techniques; 'What' lacks detail on goods.

SECTION F: Case-BASED QUESTIONS.

Ans 37 (i) Universal adult franchise means that every adult citizen has the right to vote in elections without any discrimination. ✓
(ii) Elections allow citizens to choose their representatives. **2.5/5**
(iii)

ans 38. (i) Stratosphere ✓

(ii) Troposphere ✓

5/5

(iii) ✓
★ Atmosphere protect us from harmful ultraviolet radiation ✓
★ Atmosphere regulate the temperature on the Earth.

✓ (iv) Atmosphere protects life on Earth by regulating temperature and blocking harmful solar radiation.
