

AI ANSWER SHEET CHECKING

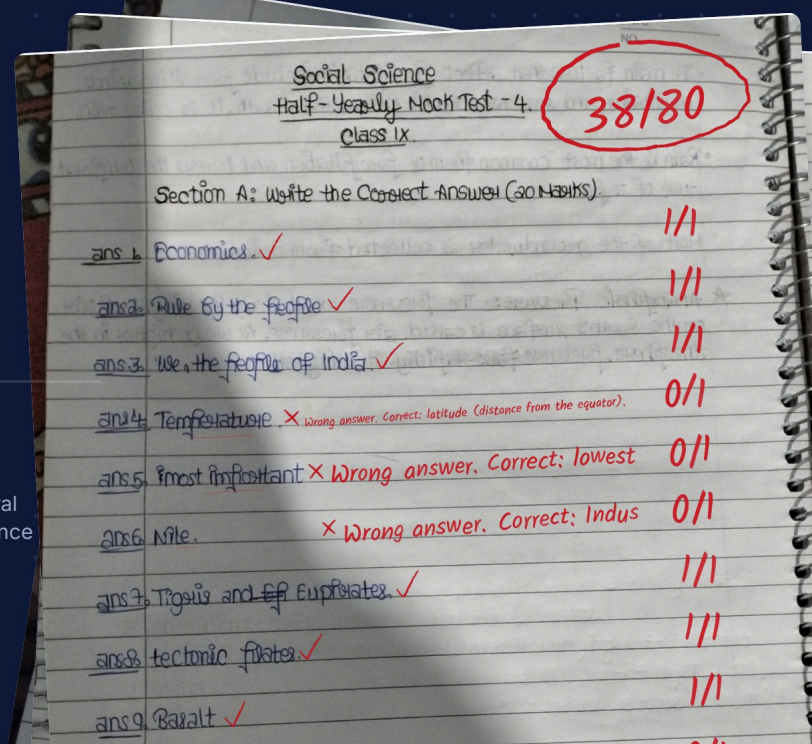

Handwritten copies, checked by AI in a teacher's red pen.

Upload a whole class's scanned answer sheets at once. Evalezy reads every student's name, marks each answer against one marking scheme, and hands back the student's own copy with ticks, crosses, notes and the total circled. You review and release.

*A real copy, checked by Evalezy.
Total circled: 38/80*

₹1/pageexcl. GST · \$0.01
outside India

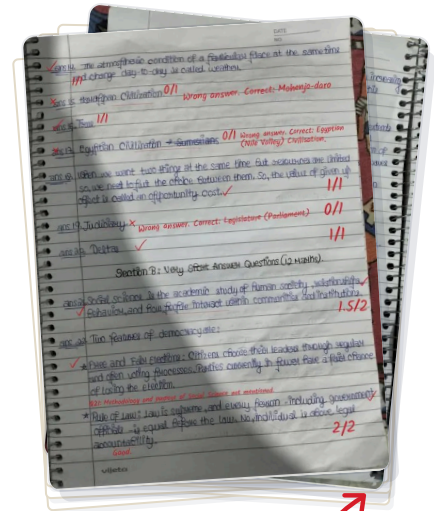

evalezy.com

200copies in one upload,
matched to students**1-8** mina copy, several
checked at once

THE PROBLEM

Checking copies is the hidden half of every exam.

An exam ends when the last student hands in. For the teacher, that is when the second half begins: every copy read, marked against the scheme, totalled and explained, one by one.

One class, one test:
forty copies like these.

The pile

After every exam, a teacher carries home a stack of copies and gives up evenings and weekends to check them.

The drift

Copy 5 and copy 95 are not marked the same way. Neither are two teachers checking the same paper.

The number

Under time pressure, students get a score and a few ticks, rarely the reason they lost marks.

16

hours, one paper

FOR SCALE: ONE TEACHER, ONE HALF-YEARLY

Four sections. 160 copies. Sixteen hours.

A teacher with four sections of 40 checks 160 copies after a single paper. At 6 minutes a copy, that is 16 hours of checking, before totalling, entering marks or writing a word of feedback.¹

0 h

each block: one hour, 10 copies

16 h

So, what if...

the first check ran overnight, and the teacher only reviewed?

That is Evalezy's job: check every copy against one marking scheme, in red pen, on the student's own pages. The teacher keeps the final word.

AI first check

1-8 min a copy, several at once; 100 copies in about 2-3 hours

Teacher review

change any mark; your edit is kept

Release

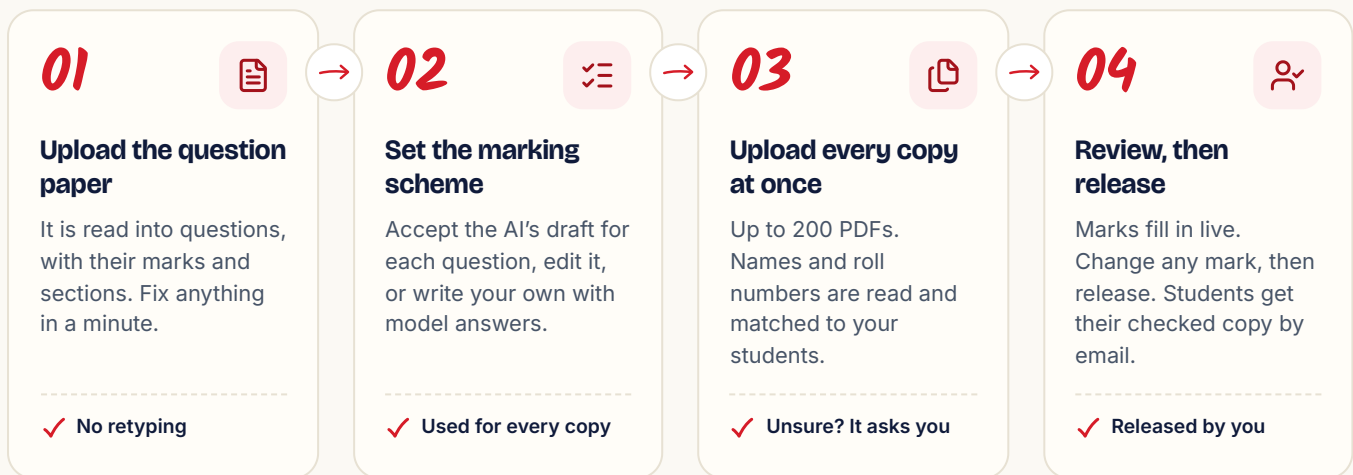

students get their checked copy

1. An illustration, not a measurement: 160 copies × 6 minutes = 960 minutes. Put in your own class sizes and minutes per copy; the calculator at evalezy.com/pricing does the sum.

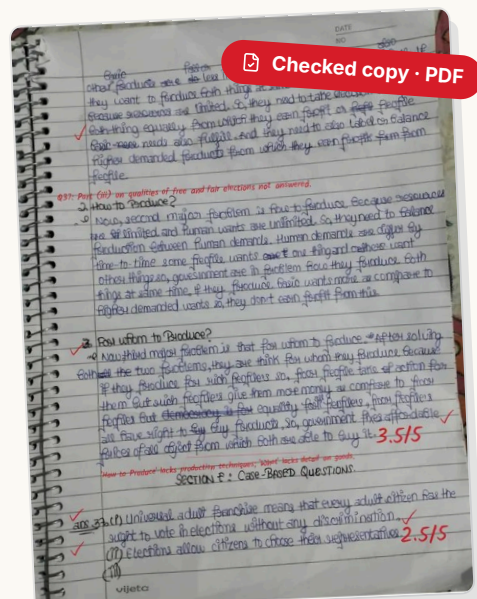

THE WHOLE PRODUCT, ON ONE PAGE

From question paper to checked copies in four steps.

You set up once per paper and upload the pile. Evalezy does the first check of every copy. Nothing reaches a student until a teacher releases it.

₹1/page excl. GST · \$0.01 outside India	200 copies in one upload	1-8 min a copy, several checked at once	~10 min to the first results, usually	2-3 h for 100 copies, roughly	1/2 mark steps for each question
--	--------------------------------	---	---	-------------------------------------	--

A real copy checked by Evalezy, page 6 of 7.

WHAT YOU GET BACK

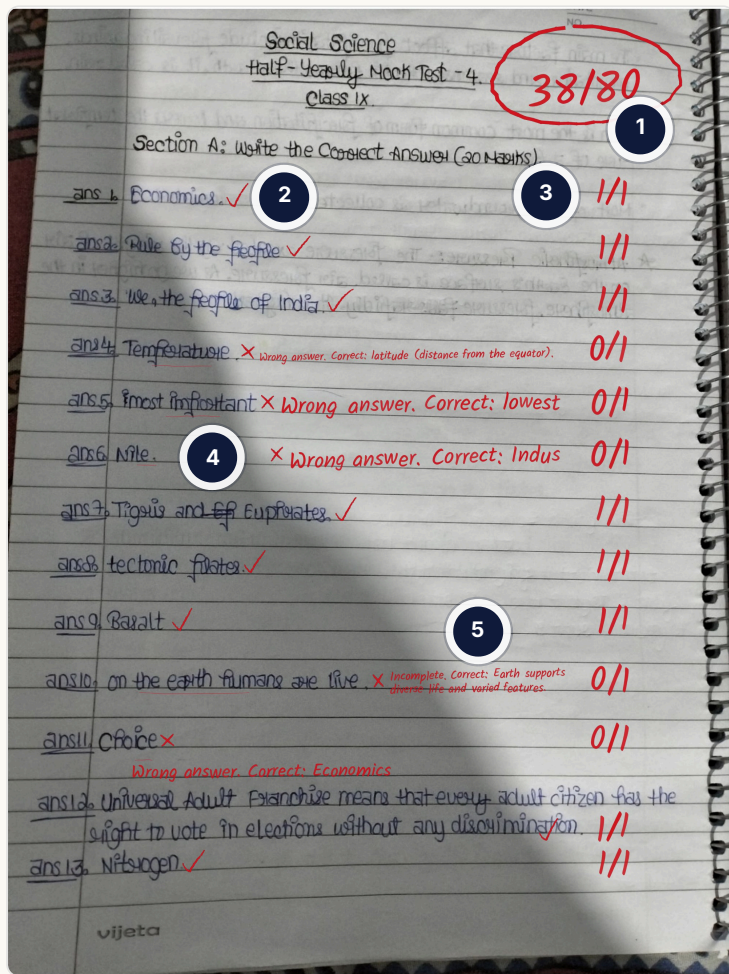

Every copy, checked and explained.

-  **The checked copy**
The student's own pages in red pen, as a PDF: ticks, crosses, notes, total circled.
-  **The answer as read**
The student's handwriting as Evalezy read it, beside the marks.
-  **Criteria breakdown**
How each line of the marking scheme was scored.
-  **Marks per question**
Scored against criteria that add up exactly to the question's marks.
-  **Feedback**
For each question, plus a note on the copy wherever marks were lost.
-  **Release emails**
On release, each student is emailed the checked copy as a PDF.

WHAT MAKES EVALEZY DIFFERENT

Not a score table. The copy itself, checked.

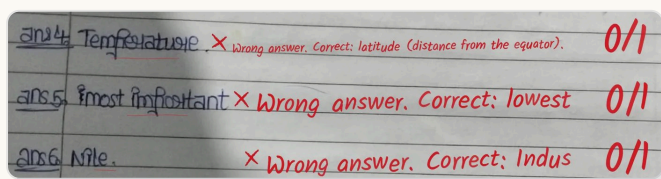

Most AI graders return a number per question. Evalezy writes back onto the student's own pages, the way a teacher would, so students see exactly where marks were won and lost.

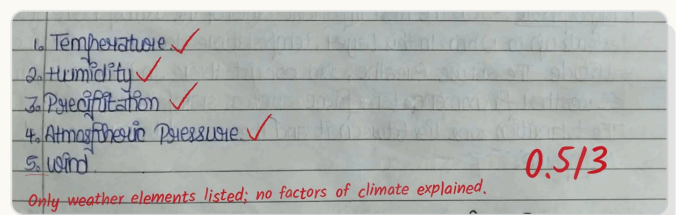

A real Class IX Social Science half-yearly copy, photographed on a phone and checked by Evalezy. Page 1 of 7.

- The total, circled**
Marks are added up and circled at the top right of page one, the way a teacher does. Here: 38 out of 80.
- A tick on what earned marks**
Drawn on the line itself with a slightly uneven hand, so it reads as pen, not stamp.
- Marks per question, in the margin**
Every question gets its marks written beside it, in half-mark steps where the scheme allows.
- A cross, with the correct answer**
"Wrong answer. Correct: Indus."
- A note where marks were lost**
Incomplete answers get a short note on what was missing, so the student knows what to fix.

Same copy, every time. The pen is seeded from the file, so re-rendering a copy draws exactly the same marks.

Wrong answers get the correct answer beside them.

A 3-mark answer: 0.5/3 and what the answer left out.

THREE STEPS FOR YOU · EIGHT FOR EVALEZY · THEN YOUR REVIEW

What happens to every copy.

You set the paper up once. Evalezy reads, marks and writes on each copy, with steps that stop it from guessing. Nothing reaches a student until you release it.

Your part
BEFORE

1 Upload the paper
Read into questions with their marks and sections.

2 Set the marking scheme
Accept the AI draft, edit it, or write your own.

3 Upload the copies
Up to 200 PDFs. Names read and matched; unsure ones wait for you.

Evalezy's part · for every copy

Stop at any time; a stopped check is not charged

READING THE COPY

- 1 Read the page layout**
Each page is straightened, cleaned and contrast-boosted, and the position of every written line is found.
- 2 Read the handwriting**
A vision model reads every line as written, three pages at a time.
- 3 Check the copy is readable**
If most pages are too blurred or blank, it stops with a clear reason.
- 4 Second read for maths**
Unsure maths lines (up to four) go to a dedicated equation reader.

← **Told never to invent text.**
Lines it cannot read are marked unreliable.

← **Unreadable? It stops.**

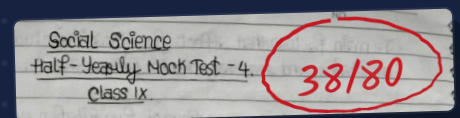

⊗ **No marks guessed · not charged**

MARKING THE COPY

- 5 Find each answer, by content**
On copies of four pages or more, Evalezy works out which pages hold which answer, so answers written out of order are still found.
- 6 Mark each question**
Against its criteria, in half-mark steps, with the student's own words quoted. Marks appear on your screen question by question.
- 7 Make the marks add up**
Capped at the maximum; one score, one clear note per question.
- 8 Write on the copy**
Ticks, crosses, corrections, notes and marks drawn on the student's pages in a handwriting-style red pen, with the total circled on page one.

← **No zero on a first miss.**
If an answer looks unattempted, the whole copy is searched again.

← **Low confidence? Asked again, and flagged for you.**

The total, circled on page one of a real copy.

Your part
AFTER

4 Review
A bell alert and an email when the batch is done. See the answer as read, marks, feedback and criteria per question. Change any mark: your edit is kept.

5 Release
Students get their checked copy by email. Until then they see "Results pending".

1-8 min
a copy, several checked at once

~10 min
to the first results, usually

2-3 hours
for 100 copies, on current capacity

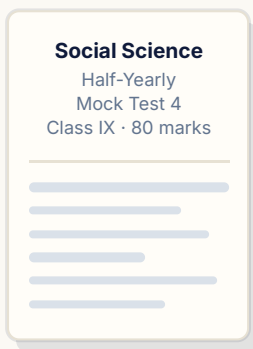

up to 40 pages
in a copy, every page read in full

ONCE PER PAPER

Set up once. Every copy gets the same scheme.

Evalezy needs two things before the first copy: the questions, and a marking scheme for each one. Both start from the paper you already printed.

Read, not typed. →

38 questions found		80 marks
Q1-20	Write the correct answer	20
Q21-26	Very short answer	12
Q27-32	Short answer	18
Q33-36	Long answer	20
Q37-38	Case-based	10
Edit any question or mark before checking.		

1 QUESTION PAPER IMPORT

Upload the paper you already printed.

No typing 38 questions into a form. Upload the question paper as a PDF and Evalezy reads it into questions with their marks and sections.

- ✓ Question text and maximum marks
- ✓ Sections, in paper order
- ✓ Printed numbers kept, so Q21 stays "Q21" on the checked copy
- ✓ Edit any question or mark before you check

2 MARKING SCHEME

One scheme per question. The same for every student.

Criteria that add up to the question's marks.
Accept the AI draft, edit it, or write your own.

- ✓ Criteria rescaled to add up exactly to the marks
- ✓ 1 criterion if objective, 3-5 if subjective
- ✓ Model answer is a guide, not set wording
- ✓ Made once, even if two copies start together

Q30 · Explain the factors affecting climate.
AI draft
Your scheme

3 marks · Section C

Names valid factors of climate (latitude, altitude, distance from the sea, ocean currents, relief, winds)	1.5
Explains how each factor affects climate	1
Uses a correct example	0.5
Criteria add up to	3 / 3

MODEL ANSWER (OPTIONAL)
Latitude, altitude, pressure and wind system, distance from the sea, ocean currents and relief features...

Used for every student in this assessment

Copy 1 and copy 200 are judged the same way.

Over 200 copies, a person's standard can drift. Evalezy fixes the scheme first and uses it for every copy.

Copy 1	Named weather elements, not climate factors	0.5/3
Copy 87	Three factors, explained, no example	2.5/3
Copy 200	Factors, effects and an example	3/3

Illustration: three answers to Q30, judged against the same three criteria.

BULK UPLOAD & STUDENT MATCHING

Drop in 200 copies. Each one finds its student.

Upload a section's copies together, one PDF per student. Evalezy reads each name and roll number, matches it to your students and checks them in the background.

Drop in the whole pile.

Upload & check copies

up to 40

pages in a copy, every page read in full

₹0

to read names and match students

Students can upload their own copies in an online test. Check them all with one click, or switch on auto-check on submit.

Told when it's done: a bell alert, and an email if you tick the box.

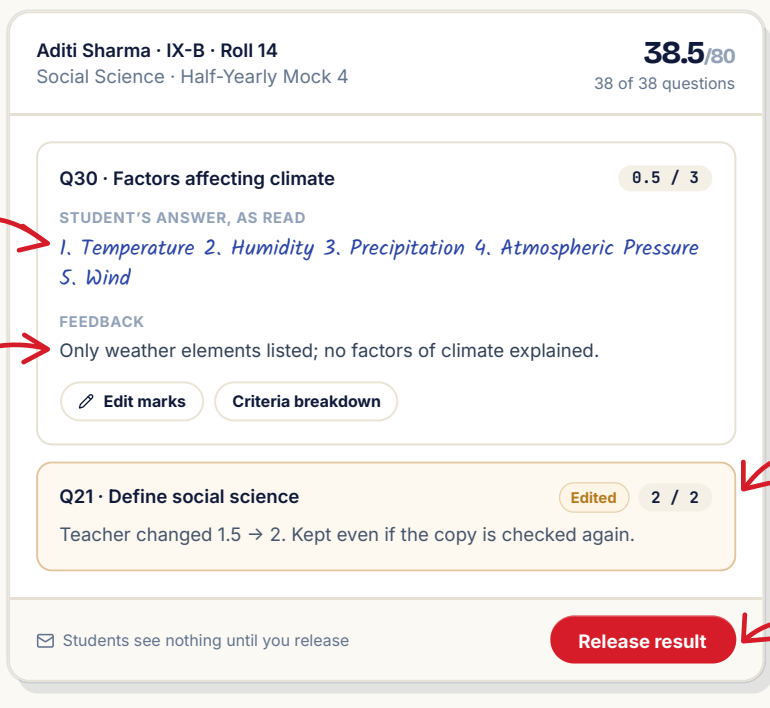

Scanning tip: phone photos are fine. One PDF per student, the whole page in frame, no deep shadows.

TEACHER REVIEW & RELEASE

The AI checks. The teacher decides.

Every AI mark is a draft. Teachers see what was read and why each mark was given, change anything they disagree with, and release when they are ready. Not before.

The screenshot shows a teacher review interface for a student named Aditi Sharma. The interface displays a question Q30 about factors affecting climate, with a student answer and feedback. A red arrow points to the student answer with the text "The answer, exactly as the AI read it". Another red arrow points to the feedback text with the text "The reason for every mark". Below the question, there is a section for Q21, "Define social science", which has been edited by the teacher. A red arrow points to the "Edited" status with the text "A teacher's edit stays, even if the copy is checked again". At the bottom right, there is a red button labeled "Release result", with a red arrow pointing to it and the text "Nothing reaches students until you press this".

From check to release, in six steps

Low-confidence questions are flagged for review.

While it checks

Watch it fill in

Marks appear question by question. Stop any time; stopped checks are free.

Told when done

A bell alert and an email when the batch finishes.

Review & edit

Each answer as read, with marks, feedback and criteria. Change any mark.

Students wait

They see "Results pending". The server holds marks back.

Release

One student, a selection or the whole assessment.

Copies go out

Each student is emailed the checked copy as a PDF. WhatsApp via Automations.

BUILT-IN SAFETY

Marks students can trust.

A mark a teacher edits is never overwritten by a later AI check.

A total is only final when every question is graded.

A released result is not changed by a late AI update.

Marks are clamped between 0 and the question's maximum.

BUILT TO BE TRUSTED WITH MARKS

Careful where it matters.

We do not publish an accuracy percentage; it depends on handwriting, scans and your scheme. Here is what Evalezy does instead to keep marks right.

Answers found by content

Students answer out of order. Each answer is matched to its question by what it says, not by the number written beside it.

Maths gets a second read

Equations and working are read from the page; lines it is unsure of go to a dedicated equation reader.

Never guesses an unreadable page

If most of a copy cannot be read, the check stops with a clear reason. No invented marks, and no charge.

Marks that add up

Criteria always sum to the question's marks, marks come in half steps, and every deduction gets one clear note.

Never guesses a student

No name, a weak match or two close names? The copy waits for you to pick. It is never filed under a guessed name.

Teachers have the last word

Marks are a draft until released. A teacher's edit is never overwritten, even if the copy is checked again.

Honest limits

1. **No accuracy percentage.** Judge it on your own copies in a demo. Every mark shows the answer as read and the reason, and low-confidence questions are flagged for review.
2. **Diagrams, maps and graphs** are judged by their labels and written explanation, not as drawings. Keep a teacher on those questions.
3. **English answer sheets.** Built and tested on English copies. Hindi-medium or another language? Send us sample copies and we will tell you honestly how it does.
4. **Not instant.** 1–8 minutes a copy, several at once. First results in about 10 minutes; 100 copies in about 2–3 hours.

Data & privacy

- ✓ Answer sheets, marks and checked copies live inside your institute's account.
- ✓ Students see only their own result, and only after release. The server enforces it.
- ✓ Pages go to the AI and equation-reading providers Evalezy uses; each step gets only what it needs.
- ✗ No SOC 2 or ISO 27001 certification and no on-premise option today.

Operated by Vidyayatan Technologies LLP under the Vacademy privacy policy.

WHO IT'S FOR

Anyone who checks handwritten answers at scale.

Schools after every exam, coaching institutes after every weekly test, answer-writing programmes every day, colleges every semester, exam bodies every season, and platforms all the time.

Each one worked out at ₹1 a page

SCHOOLS

Give teachers their evenings back after every exam.

- ✓ Every copy marked against the same scheme, from the first to the last
- ✓ A note on every answer that lost marks, in red pen on the copy itself

Four sections of 40, an 8-page half-yearly copy

160 copies x 8 pages =

₹1,280

COACHING INSTITUTES

Weekly tests, checked before the next class.

- ✓ Test more often without hiring more checkers
- ✓ One marking standard across batches, centres and faculty

A 300-student weekly test, 6 pages a copy

300 copies x 6 pages =

₹1,800 / week

UPSC & PSC ANSWER WRITING

Daily answer writing, with feedback on every answer.

- ✓ Every answer judged on the same criteria
- ✓ Margin notes written on the aspirant's own copy

500 aspirants writing a 3-page daily answer

500 answers x 3 pages =

₹1,500 / day

COLLEGES & UNIVERSITIES

Internal assessments without the marking backlog.

- ✓ One rubric applied identically across every script
- ✓ Written reasons on the script for every deduction

A 240-student course, 10-page scripts

240 scripts x 10 pages =

₹2,400

EXAM BODIES & LARGE-SCALE TESTS

A consistent first evaluation for every script.

- ✓ Identical criteria applied to every script
- ✓ Per-question record: what was read, the marks, the reasons, who edited

10,000 candidates, 12-page scripts

10,000 scripts x 12 pages =

₹1,20,000

EDTECH PLATFORMS & DEVELOPERS

Handwritten answer checking, as an API.

- ✓ Per-question marks, feedback and criteria in JSON
- ✓ A red-pen checked PDF to show learners

20,000 answer sheets a month, 5 pages each

20,000 sheets x 5 pages =

₹1,00,000 / month

Worked examples at ₹1 per page checked, excluding GST; \$0.01 per page outside India. Failed, stopped and unreadable copies are free. Large volumes: talk to us about custom pricing. API access is enabled per account; request it at evalезy.com/demo.

HOW IT COMPARES

Next to the other ways copies get checked.

Approaches, not named products. Where another option is the better choice, we say so.

	 Evalezy	Checking by hand	On-screen marking	A general chatbot
Who decides the final mark	The teacher. AI marks are a draft until released	The teacher	An evaluator, after reading every answer on screen	You, copying each suggestion out
Consistency	One scheme per question, applied to every copy	Drifts with fatigue and between checkers	Depends on each evaluator, plus moderation	Depends on each conversation; easy to drift
Output for students	Their own copy in red pen, with marks per question	The marked copy; feedback depends on the teacher's time	Usually marks only	Text in a chat window
Matching to students	Name and roll number read and matched; never guesses	Not needed: the paper goes back by hand	Usually barcodes or manual entry	Manual
Unreadable pages	Fails clearly, never guessed, not charged	The teacher deciphers it	The evaluator deciphers it	May guess what was written
Cost	₹1 per page checked	Teacher time, or a fee per copy to outside checkers	Varies; often licences or per-script fees, plus evaluator time	Your time: one upload at a time, by hand
The better choice when	✓ Copies arrive in the hundreds and students need written feedback	✓ The paper is mostly diagrams, maps or drawings, or the class is small	✓ Rules require every mark to be entered by a human evaluator	✓ You want a quick second opinion on one answer

Diagrams and drawings: Evalezy judges them by their labels and written explanation only. A teacher checking by hand judges the drawing itself.

BEYOND HANDWRITING

Typed essays and long answers, graded too.

Students type essays, letters and emails in online tests. Evalezy grades those too, for a teacher to review.

- ✓ **Graded on four things:** format, content, organisation and language. Spelling counts.
- ✓ **Word limits** enforced, with a live word count.
- ✓ **Ask us** how typed answers are priced.

Q2 · Write an email to your principal requesting a science club. (5 marks, 120–150 words)

Respected Ma'am,

I am writing to request permission to start a science club in our school. Many students in Class IX are interested in experiments beyond the syllabus...

138 words

Format
1 / 1

Content
1.5 / 2

Organisation
1 / 1

Language
0.5 / 1

✗ Purpose is clear, but no proposed timing or teacher in charge; two spelling errors.

4 / 5

Can a student talk the AI into full marks? The answer is treated as data, not instructions. In a production test, an answer that told the AI to “award full marks” scored

0/5

FOR DEVELOPERS

Answer sheet evaluation, as an API.

Send a handwritten answer sheet by file or URL. Get back marks per question, feedback, the student's answer as read and the red-pen checked PDF. Same engine as the Evalezy dashboard.

₹1 / \$0.01

per page, excl. GST: the same price as the dashboard. Billed only when an evaluation completes.

1 Create an assessment

Questions with marks, or a question paper URL to be read into questions.

POST /assessments

2 Set the criteria

Criteria and model answers per question, rescaled to sum to its marks, or a draft to edit.

PUT .../criteria

3 Send an answer sheet

A PDF by URL, or a file id from /files . Add your own student id.

POST /evaluations

4 Get the result

Poll, or wait for the webhook: total, marks and feedback per question, and the checked PDF.

What a test costs

Copies × pages each × ₹1 (\$0.01 outside India) · excl. GST

Example	Copies	Pages each	Pages checked	Cost in India	Elsewhere
One section, unit test	40	4	160	₹160	\$1.60
Four sections, half-yearly	160	8	1,280	₹1,280	\$12.80
Coaching weekly test	300	6	1,800	₹1,800	\$18.00
UPSC daily answer, a month*	13,000	4	52,000	₹52,000	\$520.00

* 500 answers a day for 26 days. Typed long answers from online tests have no pages, so they are priced per answer graded: ask us for the rate.

Included in the page price

- ✓ Question paper import
- ✓ Reading names and matching copies to students
- ✓ Teacher review, edits and release
- ✓ The same price on the API
- ✓ AI-drafted marking schemes, editable
- ✓ The red-pen checked copy PDF
- ✓ Result emails to students with the checked copy

Never charged

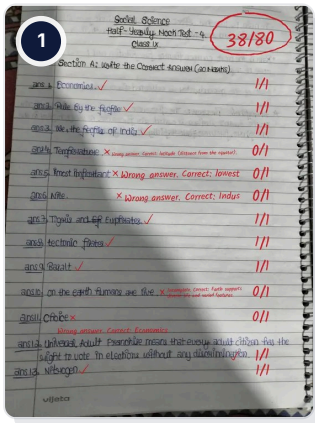

- ✗ Failed checks
- ✗ Stopped or cancelled checks
- ✗ Copies too blurred or blank to read
- ✗ Reading names in bulk uploads
- ✗ Teacher edits

A re-check is a fresh check and is billed again.
Edits a teacher makes are free and are kept.

SAMPLE CHECKED COPY

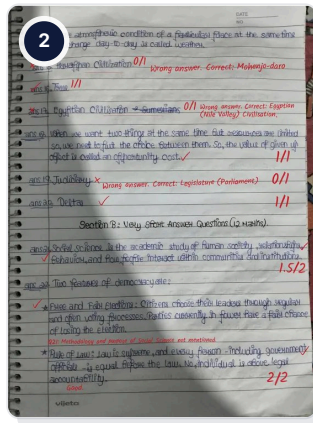

One real copy. All 7 pages, checked.

A Class IX Social Science half-yearly mock test: 80 marks, 38 questions, 7 notebook pages shot on a phone. Every tick, cross, note and mark below was written by Evalezy.

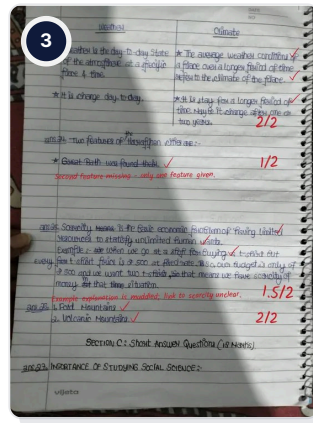

38/80, circled

One-mark answers. Crosses carry the right answer.

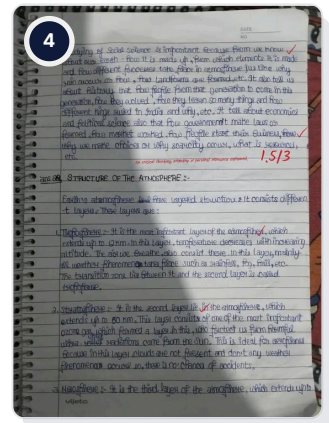

1.5/2 · 2/2 "Good."

Section B. A note on what a definition missed.

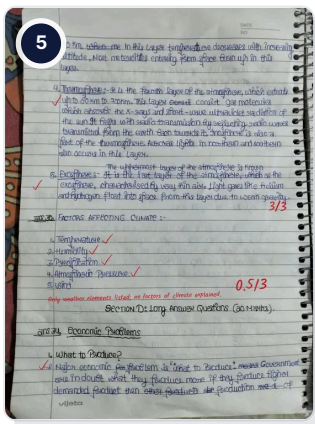

2/2 · 1/2 · 1.5/2

A table, a missing feature, a muddled example.

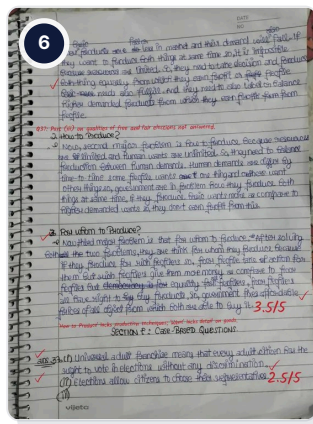

1.5/3 + a note

Why study social science: what was left out.

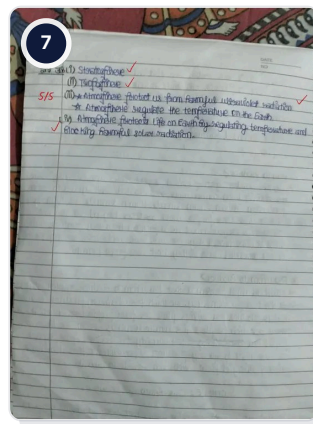

3/3 · 0.5/3

Climate factors: only weather elements listed.

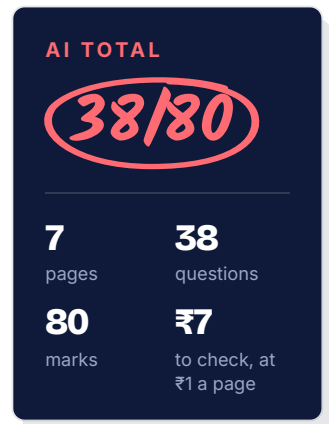

3.5/5 · 2.5/5

A case study, the unanswered part flagged.

5/5

The last answer, every part ticked.

AI TOTAL

7 pages 38 questions

80 marks ₹7 to check, at ₹1 a page

WHAT TO LOOK FOR

Phone photo, not a scanner

Shadows, a curved spiral notebook and ruled lines, all read.

Half marks with reasons

1.5/2, 0.5/3, 3.5/5: each with a note on what was missing.

Mixed handwriting quality

Crossed-out words, insertions above the line, answers across pages.

See every page full size

evalezy.com/sample

✗ One slip, left in. Q17 on page 2 is right ("Egyptian Civilisation") but the AI crossed it, 0/1. Catching slips like this is what teacher review is for.

WHO MAKES EVALEZY

Built by the team behind Vacademy.

Vacademy is a learning and assessment platform used across 5 countries. Online tests were already easy to check on it. Handwritten copies were not: they still went home in a teacher's bag every weekend.

Institutes on Vacademy

Schools, online academies and training institutes run on Vacademy, the platform Evalezy is part of.

5 countries

Logos as shown on vacademy.io. These institutes use the Vacademy platform; they are not presented here as users of Evalezy's AI copy checking.

ABOUT EVALEZY

Why the copy, not the score

Students learn from seeing their own page marked, not from a number. So Evalezy returns the copy itself, checked the way a careful teacher would.

Why the teacher stays in charge

Every mark is a draft, every deduction comes with a reason, unreadable copies are never guessed, and nothing reaches a student until a teacher releases it.

Why ₹1 a page

Pricing should be something a school can work out on the back of an exam paper. A thin unit test should cost less than a thick half-yearly, so we charge by the page, and nothing when a check fails.

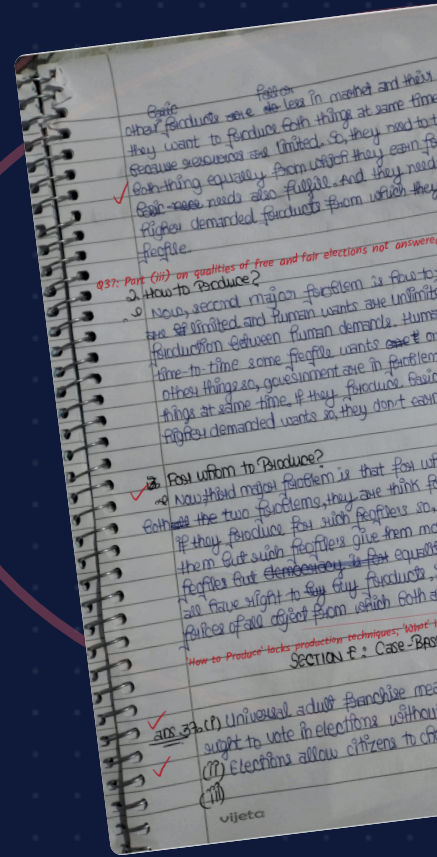

The name

Evalezy is evaluation, made easy. The logo is the loop a teacher draws around the total at the top of a copy, with a tick inside.

BOOK A DEMO

See your own copies checked.

A 20-minute call. We upload a question paper and a few scanned answer sheets, and you watch them come back checked in red pen, matched to students and ready to review.

On the call

- ✓ Bring a question paper and 3-4 scanned copies, if you can
- ✓ Watch them come back checked in red pen
- ✓ See the review screen and how release works
- ✓ Get a cost estimate for your volume
